

Fixed Feature button definition

Button	Description
3 Soft	Used in conjunction with fixed and flexible features, and the function changes in relation to call progress, as indicated on the LCD display.
Page	Used to change more additional functions on the LCD display .
Trans/PGM	This button is used to initiate a call transfer (TRANS) or to enter programming mode (PGM).
Speed	Used to access speed dialing, speed programming, save number redial, and last number redial.
DND	The DND (Do Not Disturb) feature blocks all calls. When DND is active, the red LED in this button is illuminated. When pressed after the Speaker button it is used for setting call forwarding. Used by the attendant to set the Day/Night mode.
Call Back	A station can initiate a call back request to a busy station. Once that station becomes idle, the initiating station is signaled.
Mute	Toggle outgoing audio; red LED illuminates.
Volume	The volume button adjusts the audio levels for ringing, handset and speakerphone functions.
Speaker	Speaker toggles the speakerphone state, and the red LED is illuminated when the speakerphone is active.
Hold/Save	This button is used to put a call on hold or save information when programming.
30 Flexible	Some flexible buttons are pre-programmed in the system for line appearances, loop functions etc. The remaining flexible buttons can be user-programmed.
Visual Ringing LED	Illuminates when there is a message (in some cases when phone is ringing).
LCD Display	Displays information about telephone status, dialing directories, and message information.
Hands-free Microphone	Microphone is used for hands-free speakerphone function.
